

More Ways to Earn More Money for Approved Roadside Assistance Contractors.

As a Roadside Assistance Contractor, you can expect to see an increase in business as a result of responding to more calls. In addition to this opportunity for growth to current business operations, you can also take advantage of other opportunities offered by AAA that can grow your business and increase potential revenue and profits.

AAA Mobile Battery Program.

The AAA Mobile Battery Program is an effective way to differentiate our road service and achieve our objective of getting the member's vehicle back on-the-go. Upon arriving on scene, Roadside Assistance Contractors provide a free check of the battery's condition and offer to install a new AAA battery on scene if needed.

AAA branded batteries are also available for retail on-site at Approved Auto Repair facilities. AAA Members can use their member discount and have a new battery installed while their vehicle is in for service with the same warranty as with our mobile service. Benefits of joining can include:

- Increased revenue
- Reduced operating expense
- Increased Overall Member Satisfaction scores
- Industry leading testing equipment
- Comprehensive training program
